Climate Change Policy

Climate change policy for Tata companies

Tata companies will play a leadership role in climate change by being knowledgeable, responsive and trustworthy, and by adopting environment-friendly technologies, business practices and innovation, while pursuing their own growth aspirations and the enhancement of shareholder value.

Tata companies will measure their carbon footprint and will strive to:
- Be the benchmark in their segment of industry on the carbon footprint, for their plants and operations.
- Engage actively in climate change advocacy and the shaping of regulations in different business sectors.
- Incorporate ‘green’ perspective in all key organisational processes.

October, 2009
Ratan N. Tata
Chairman, Tata Sons

Tata Chemicals has adopted the Tata Group Climate Change Policy for implementation.

Additionally, Tata Chemicals, while playing a leadership role, will:

- Continue to measure and mitigate its specific carbon emissions within its operations by setting internal targets and investing in processes and equipment to meet the targets.

- Extend the scope to include Lifecycle emissions

- Address the risk and build resilience to counter climate change impacts on its businesses and communities it serves globally.
